

Callisto Blade Baffle Design

Callisto

The Callisto Blade Baffle design gives a narrow and well dimmed downlight distribution and a broad upright distribution. The broad upright distribution makes the luminaire suitable for offices with a low floor-to-ceiling height.

Very suitable for the small office where the luminaire is intended for single use. Callisto 1042/54 DE is prepared for DimEasy control. DimEasy grants the user entire liberty to choose the level of brightness that he prefers. There is a built-in pull switch in the luminaire.

Facts

Luminaire:

The Callisto body is made of extruded, anodised aluminium with end-pieces of transparent polycarbonate.

Reflector/louvre:

The reflectors are made of pure aluminium with a super-gloss anodised finish.
Aluminium blade baffle.

Connection:

Top cable entry at one end-piece. Comes with mains cable and plug as standard equipment.

Installation:

Suspended from the ceiling by means of the enclosed wire suspension device, which is adjustable along the whole luminaire.

Miscellaneous:

The luminaire comes with fluorescent lamps (colour 830), and a 2.5 m white mains cable RJ4C 3x0.75 mm² with an earthed mains plug. Callisto 1042/54 DE is prepared for DimEasy control. DimEasy grants the user entire liberty to choose the level of brightness that he prefers. There is a built-in pull switch in the luminaire.
