

Galatea uplight

IP20 T5   CE

Galatea uplight

Galatea Uplight uses the reflexes of bright ceilings to create a broad light distribution, for instance in open plan offices, where flexible lighting solutions are required. The uplight is a comfortable light and therefore preferred in lobbies and assembly halls. A good solution is to use the Galatea uplight as general lighting matched with Galatea downlight as local oriented lighting. (See separate product sheets for Galatea Downlight suspended and recessed.)
